LAFORGE's unique expertise in tractor-implement integration, and a close cooperation with John Deere, has allowed LAFORGE to develop the GreenLink® HD6/9R PowerFold® Front Hitch to optimize the performance of the John Deere 9R tractors.

GreenLink® HD6/9R PowerFold®

GreenLink® HD6/9R PowerFold® in folded up position with optional hydraulic center link

The GreenLink® HD6/9R PowerFold® is recommended for heavy duty and intensive applications such as chisel plow, ripper, moldboard plow, dozer blade...

Reinforced arms and under-axle frame makes it all designed for demanding applications, when extra strength is required.

Ground clearance and manoeuvrability are fully retained

Technical Data of the PowerFold®

Category	3N
Lift capacity	6400 Kg (14100 lb)
Lift range	800 mm (31,5 ") + 230 mm (9 ") (folded position)

Exclusive and patented PowerFold® System

The POWERFOLD® system allows the front hitch to:

- Go up to folded position, under operator control, without requiring any manual handling of parts.
- No special operation required to return to work position

The perfect solution:

- For compactness and safety
- For working without restrictions
- For saving time

The GreenLink® HD6/9R PowerFold® front hitch is fully compatible with the exclusive and patented LAFORGE electronic control and dynamic contour following system DYNACONTOUR®, Gold Medal SIMA 2005.

This system dynamically corrects the front hitch position by measuring the length of the upper link. Without any adjustment, DYNACONTOUR® provides real time field contour following and allows for the full benefit of IMS by simplifying headland operations.

Check maximum axle load and tire pressure (in relation with travel speed) with John Deere and tire manufacturer.
LAFORGE's responsibility is limited to our product. Specification and design subject to change without notice. 02/13
